GUIDANCE TO THE USER

Bold headings are used for major subjects, including the various railway companies. Articles are shown in bold italics.

Locations are always listed separately, and may also occur under some main headings, but not generally under railway companies.

Personal references are found mainly in two categories. References to members of the Cumbrian Railways Association are found under that heading. References to other "Personalities" of all types are found under that heading.

Only major contributions such as articles and drawings include the name of the author or originator in the index reference.
